

Workshop for community and school oral health promotion in Mondulkiri, the Kingdom of Cambodia

1. Introduction of the Project "Establishment and Spread of Oral Health Activities for the People in Mondulkiri, the Kingdom of Cambodia"

1-1. Purpose of the Project

The purpose of the Project is to promote oral health through communities and primary schools in Mondulkiri. The final purpose of the Project is to sustain oral health promotion under local government's initiative.

1-2. Achievement of the Project (Nov 2010~Mar 2012)

Since Nov 2010 to Mar 2012, OISDE intervened in the operational institution to promote oral health in Mondulkiri. (Fig.1)

Survey

OISDE implemented survey for selecting targeted area and baseline survey including oral health examination and behaviour.

Education

At first, OISDE produced educational materials.

In order to provide oral health education for villagers and schoolchildren, Dental Care Assistants (DCAs) and primary school teachers have been trained and monitored about method of tooth brushing and knowledge of oral health behaviour by the OISDE. (Fig.2)

1-3. Future prospect of the Project (Apr 2012~Nov 2013)

Through the Project, OISDE has built cooperative relationship with communities and primary schools and established the foundation for oral health program in Mondulkiri.

The final purpose of the Project is that Mondulkiri will continue to implement oral health program under local government's initiative. OISDE will focus on transferring oral health promotion skills to the local government in order to conduct oral health promotion in the province sustainably.
